Maths

This week we have been learning about graphs. Here is a question we have done for you to try again at home.

Tap A was turned on to fill up an empty container. Two minutes later Tap B was turned on to increase the rate of flow.

The graph below shows the amount of water in the container over a period of 6 minutes. Tap A was turned on at 0 minutes.

Draw another line graph to show the amount of water in the container over a period of 6 minutes if only Tap B was turned on from the beginning.
